

Table 1: Logistic Regression: Unobserved and Observed Valence Characteristics

	<i>Dependent variable:</i>
	Corruption Indictment
Age	0.0002 (0.0004)
Female	−0.010 (0.016)
Business	−0.004 (0.017)
Government	−0.008 (0.029)
Technician	−0.002 (0.025)
White-Collar	0.019 (0.016)
Higher Education	0.00002 (0.048)
Middle School	0.060 (0.049)
Incumbency Status	−0.002 (0.056)
incumbent	0.004 (0.010)
Constant	−0.012 (0.053)
Observations	515
Log Likelihood	428.992
Akaike Inf. Crit.	−835.984
<i>Note:</i>	*p<0.1; **p<0.05; ***p<0.01
